ALTITUDE ALUMINIUM

world leading aluminium windows and doors

Halo I

Designed to transform your living area and make better use of your footprint, the Halo I range is a steel-look glazed wall and door system. Allowing for a combination of light, air and space, Halo I creates the perfect ambience in a home whilst also providing privacy.

Versatile by design, the customisable Halo I complements every look, from contemporary to traditional. Bringing character, class and continuity of your style throughout your interior space, Halo I also fulfils those practical needs to zone off areas for quiet work, rest, and of course, play.

With a glass divide sightline of just 30mm, Halo I offers more light and slimmer sightlines compared to some steel and aluminium alternatives. Halo I is available as a single or French door - but the design options don't end there. All configurations can have fixed frames added to the top or sides, or can be coupled together with a corner post, allowing you to reinvent your space and bring your interior design dreams to life.

Sometimes one shade is enough...

Black goes with everything

Extending the simplicity and effortless style of the Halo I design, the slim frames are exclusively available in black, ensuring that they complement and add to the flow of your internal space.

Visually grounding, whether you prefer a contemporary Soho loft or traditional heritage look, the slim sightlines and sleek style of the black frames come together to create a look that speaks to your soul.

With a finish that withstands the relentless knocks and scrapes of constant use as well as the UV coming from lighting, your Halo I system will look consistently fresh and new throughout all of your wallpaper and furnishing design changes.

Your internal doors your way...

When you choose Halo I, the only limit is your imagination.

Choose your preferred configuration using a combination of single doors, French doors and fixed frames and take the first step towards transforming your space.

Specify your overall size, desired set up, handle type, colour and locking mechanism. Do you want the doors to open in or out, what style (if any) of splits or glazing bars you want and their frequency. Don't forget any further design or practical features such as kickplates or panels. Then allow us to create the design statement that's right for your home and way of living.

Individual doors can be sized up to 1000mm wide and up to 2500mm tall, with the option to go up to 3000mm in height by coupling a fixed light above, allowing you to really make a design statement.

Handled with style...

From the accented bushes in the hinges through to the acoustic brush seal at the bottom of the door, precision engineering was core to our design intent, and that's certainly the case when it comes to our handles.

A door's handle is absolutely fundamental to how a door looks and feels. It's the first detail your eyes are drawn to, and the first point of contact when you open the door. A handle should complement the design style of the door whilst also reflecting the design intent of the surrounding interior. Our hardware range is designed to allow you to do just this.

Corner configurations

By using a combination of single or French doors, along with a corner post and fixed frames, a corner configuration can be created, which offers even more possibilities to section out areas, even in the most unconventional space.

Halo I can be used in either residential or commercial settings, but here is where a corner configuration really comes into its own. Creating either a breakaway room or central boardroom, they're truly unique in being able to develop an entire new room as big or as small as you require.

Fixed wall, fixed screen or room divider

Perfect for extending the 'wall of glass look' within your home, a fixed frame can be placed above or alongside your door configuration to increase the height or add to the width. Alternatively, if access isn't required, the Halo can be used as a standalone fixed screen.

Glass and glazing

You can choose your preferred type of glass for these doors and glazed walls. A few favourite types of glass include clear, frosted or reeded options. The latter offers the flexibility of light being able to travel through the home whilst concealing perhaps the laundry in the utility room, or offering privacy for a bathroom.

Handles

Choose from a selection of elegant handle styles that have been designed and manufactured with the same care and dedication as every other door component.

There are four optional handle collections available; the Standard Handle, the Signature Collection, the Contemporary Collection and the Heritage Collection.

Standard Handle

This handle offers a simple yet striking look.

Signature Handle

The Signature handle is a statement piece with its knurled finish.

Contemporary Handle

The Contemporary Handle range is available in matt and satin finishes.

Heritage Classic Handle

Paying homage to the traditional steel-look door, we have two Art Deco style iron handles avalable.

Heritage Edged Handle

With a similar style to the Heritage Classic, this handle has much more squared off features.

Turn and Release

Our turn and release locks are available to match our handle suite and are available in Antique Brass, Matt Black, Matt Bronze, Satin Brass and Satin Nickel.

Door Stops

A convenient feature, these door stops are available in Antique Brass, Matt Black, Matt Bronze, Satin Brass and Satin Nickel.

Hinges

The hinges are available in Black, Polished Brass, Satin Brass and Satin Steel. They also come with a subtle copper accent which accentuates both the door and hinge.
