Home begins at your door

We can feel at ease in many different places and in many different ways. In the city or in the country, surrounded by nature or by good friends. But there is a unique and unmistakable feeling that everybody experiences in their own way: the feeling of being at home, the moment they open the front door.

A Hörmann entrance door contributes its part to all the things that make a home, creating a sense of well-being, content and security. Take your time to browse our comprehensive programme – we're sure you will find the entrance door that best suits your taste and your home's architecture.

“A good reputation must be earned.”

August Hörmann

In keeping with the tradition started by the company's founder, the name Hörmann delivers brand name quality with extensive product expertise. The family business has over 75 years of experience as a construction component specialist and sees itself as your partner from the very beginning of building and renovation projects. It's no surprise that Hörmann is one of Europe's most successful entrance door providers. All of this gives you a good feeling when you purchase a Hörmann entrance door.

1 Quality products from Germany

The entrance door construction is developed and manufactured by Hörmann. Our highly qualified employees work intensively on new products, continual further developments and improvements to details. Patents and unique products on the market are the result of this. Endurance tests under real conditions ensure mature series products with Hörmann quality.

2 Entrance doors for generations

We are convinced of our products and our uncompromising quality assurance. That is why we issue a 5-year guarantee* on ThermoPlus entrance doors and even a 10-year guarantee* on ThermoCarbon, ThermoSafe and TopComfort entrance doors.

3 An eye on the future

Hörmann is setting a good example. This is why, since 2013, the company has obtained 40 % of its required energy from green sources and will continue to increase this percentage. At the same time, many tonnes of CO₂ are saved each year thanks to the introduction of an intelligent and certified energy management system. And last but not least, Hörmann offers products for sustainable construction. Find out more about Hörmann's environmental activities in the "We think green" brochure.

Interior view

4 Door leaf without visible leaf profile

Our ThermoCarbon, ThermoSafe and ThermoPlus entrance doors give you an exquisite and elegant reception. The shapely door leaf with its solid interior and exterior and leaf profile on the inside fulfils the highest design requirements. The interior view harmonises perfectly with your residential internal doors and looks particularly elegant with concealed hinges, which come as standard for ThermoCarbon and are optional for ThermoSafe entrance doors.

5 Excellent thermal insulation

ThermoCarbon aluminium entrance doors with a U_D -value of up to $0.47 \text{ W}/(\text{m}^2\cdot\text{K})^*$

Our doors are the new generation of high-insulation entrance doors. With U_D -values up to $0.87 \text{ W}/(\text{m}^2\cdot\text{K})$, ThermoPlus doors have excellent thermal insulation values. ThermoSafe entrance doors are also distinguished by their U_D -values of up to $0.8 \text{ W}/(\text{m}^2\cdot\text{K})$. Both door systems comply with all the requirements of the new EnEV 2014. Our ThermoCarbon entrance doors are clearly the world champions when it comes to thermal insulation: They feature unparalleled U_D -values up to $0.47 \text{ W}/(\text{m}^2\cdot\text{K})$ and are also certified for low-energy houses by the IFT Rosenheim.

For ThermoSafe and ThermoCarbon entrance doors with glazing, the door leaf is foamed together with the glazing and not beforehand, as is usually the case. This patented solution means that we can achieve even better thermal insulation, as the foam is combined with the glazing in an optimal way that prevents thermal bridges.

* Door size $1250 \times 2200 \text{ mm}$
(the U_D -value is dependent on the door size)

6 Break-in-resistant locking

Only from Hörmann

RC 4 security equipment for ThermoCarbon entrance doors

Our entrance doors set new standards for security. All doors are equipped with multiple-point locking as standard. This means the hinge side is also protected against forced opening.

All our entrance doors are optionally available with especially break-in-resistant RC equipment to give you and your family even more security. Featuring security equipment up to RC 4, ThermoCarbon entrance doors are at the top of their class.

Our entrance doors' certified break-in resistance is also recommended by police information centres.

7 Safe glazing

Only from Hörmann

8 mm laminated safety glass on the interior and exterior

When it comes to industrial safety and burglar protection, Hörmann entrance doors fulfil the highest demands. The 8-mm-thick laminated safety glass on the interior and exterior of the insulated glazing provides maximum security. In case of breakage, the glass splinters are bound and stay adhered to the plastic film on the inside, virtually eliminating any danger of being injured by the shards. Furthermore, the laminated safety glass offers better protection against burglars as it makes reaching through more difficult.

8 Convenient door operators

Fascinating and innovative technology that offers you more comfort: the Hörmann door operator ECturn for ThermoSafe and ThermoCarbon entrance doors. You can conveniently use the operator with Hörmann BiSecur hand transmitters or radio buttons. With the BiSecur app, you can query the status of your door at any time and from anywhere in the world. The ECturn operator is also ideally suited for barrier-free construction. For further information, please see page 85.

9 Room-high entrance doors

ThermoSafe and ThermoCarbon entrance doors in XXL versions offer you generously proportioned entrance designs and increased comfort. ThermoSafe styles are available up to a height of 2500 mm, and ThermoCarbon even up to 3000 mm.

Which door fulfils your requirements?

Discover the four entrance door versions from Europe's no. 1. Each one of them fulfils your personal requirements for an entrance door in its own way. However, they all have one thing in common: genuine Hörmann brand quality!

Aluminium and steel entrance doors are superior to plastic or timber doors in many ways.

The advantages:

- High thermal insulation
- High security
- High acoustic insulation
- High stability
- No follow-up painting necessary

Aluminium and steel entrance doors look new even after many years, and also offer you a large variety of options with regard to technical equipment and design.

ThermoCarbon

U_D -value of up to
 $0.47 \text{ W}/(\text{m}^2 \cdot \text{K})^{**}$

Approved by the IFT Rosenheim

Premium class:
ThermoCarbon

Our thermal insulation world champion, best-in-class for security for aluminium entrance doors, is distinguished by U_D -values of up to $0.47 \text{ W}/(\text{m}^2 \cdot \text{K})$. It is also characterised by outstanding security equipment with 9-point locking and a high-tech leaf profile made of carbon glass-fibre hybrid material. See the unique ThermoCarbon entrance doors for yourself, starting on page 14.

ThermoSafe

U_D -value up to
 $0.8 \text{ W}/(\text{m}^2 \cdot \text{K})^*$

Approved by the IFT Rosenheim

ThermoPlus

U_D -value up to
 $0.87 \text{ W}/(\text{m}^2 \cdot \text{K})^*$

Approved by the IFT Rosenheim

TopComfort

U_D -value up to
 $1.3 \text{ W}/(\text{m}^2 \cdot \text{K})^*$

Approved by the IFT Rosenheim

Top-class:
ThermoSafe

Especially high thermal insulation thanks to a 80-mm aluminium frame with thermal break, good security equipment with a 5-point security lock and a choice of over 70 styles – these are only a few of the convincing arguments our ThermoSafe entrance door has to offer. For more details and to find your favourite style, see from page 26.

Mid-range:
ThermoPlus

The ThermoPlus entrance door with steel door leaf and aluminium frame offers good thermal insulation values and high break-in-resistance with a 5-point security lock. Last but not least, ThermoPlus has an excellent price-performance ratio. For more information on ThermoPlus and all styles and equipment options, see from page 50.

Comfort category:
TopComfort

Are you looking for an entrance area bathed in sunlight with a glass entrance door that is well equipped in terms of thermal insulation and security? Then our TopComfort entrance door is just right for you. Choose your favourite from 9 glazing designs and a variety of ornamental glazings. For more information on TopComfort, see from page 60.

Thermal insulation world champion and best-in-class for security

Our aim was to create an entrance door that exceeds your requirements for security, thermal insulation, technical equipment and design. We have succeeded with the premium ThermoCarbon entrance door. With U_D -values up to $0.47 \text{ W}/(\text{m}^2 \cdot \text{K})$, ThermoCarbon has earned its title as thermal insulation world champion, and with the optional RC 4 equipment, it is at the top of its class in terms of security for aluminium entrance doors. With its high-tech leaf profile made of carbon glass-fibre hybrid material, our premium entrance door is exceptionally impressive, offering a high degree of rigidity and impact resistance as well as improved acoustic insulation like none other.

The ThermoCarbon entrance door is available in a choice of 15 modern door styles in 18 preferred colours, and optionally in two colours on request. Of course, you can customise your entrance door even further with many other equipment options such as handles, glazings and lock variants.

Design

- 1** 100 mm aluminium door leaf with PU rigid foam infill and internal leaf profile
- 2** Thermal break and high stability thanks to carbon glass-fibre reinforced composite leaf profile
- 3** 111 mm aluminium door frame with thermal break
- 4** Triple sealing with two all-round seals

Fulfils all requirements of EnEV 2014
and is certified for low-energy houses
by the IFT Rosenheim*

Suitable for fitting without thermal bridges

U_D -value up to $0.47 \text{ W/(m}^2\cdot\text{K)}$

Equipment

- 5** Solid door view from the inside, same as room doors
- 6** Concealed hinges
- 7** Stainless steel lever handle
- 8** Tamper-proof profile cylinder
- 9** 9-point security lock

Optional RC 2 / RC 3 / RC 4
safety equipment

Interior view

**Style 300**

Style 686

Stainless steel handle HOE 600, stainless steel embellishment, matt float design glass with 7 clear stripes, quadruple thermal insulation glass, certified low-energy house door, U_D -value up to $0.55 \text{ W/(m}^2\cdot\text{K)}^*$

Style 860

Stainless steel handle HOE 700, certified low-energy house door, U_D -value up to $0.50 \text{ W/(m}^2\cdot\text{K)}^*$

Find your favourite colour

Whether you prefer anthracite or white, red or green, smooth or textured – Hörmann offers you custom design possibilities for colour and surface finish. As standard, entrance doors are delivered in inexpensive matt Traffic white, RAL 9016. In addition to our 18 preferred colours, you will certainly find something to suit your taste in our selection of over 200 RAL colours. Would you like different colours on the inside and outside? That's no problem either. Simply contact your local Hörmann dealer to receive an individual consultation.

Please note:

All colours based on RAL.

The colours and surfaces shown are subject to the limitations of the printing process and cannot be regarded as binding. Please seek the expert advice of your Hörmann specialist dealer.

Matt, silk-gloss and high-gloss surfaces

- | | | |
|----|----------|-----------------------------|
| 1 | RAL 9016 | Traffic white, high-gloss |
| 2 | RAL 9006 | White aluminium, silk-gloss |
| 3 | RAL 8028 | Terra brown, matt |
| 4 | RAL 7040 | Window grey, matt |
| 5 | RAL 7030 | Stone grey, matt |
| 6 | RAL 7016 | Anthracite grey, matt |
| 7 | RAL 7015 | Slate grey, matt |
| 8 | RAL 6009 | Fir green, matt |
| 9 | RAL 6005 | Moss green, matt |
| 10 | RAL 3003 | Ruby red, matt |

Textured surfaces

1	RAL 9007	Grey aluminium, textured
2	RAL 9001	Cream, textured
3	RAL 7039	Quartz grey, textured
4	RAL 7030	Stone grey, textured
5	RAL 7016	Anthracite grey, textured
6	RAL 7015	Slate grey, textured
7		Hörmann colour CH 703, Anthracite, textured
8		Hörmann colour CH 607, Chestnut, textured

Design your door colour exactly as you wish, inside and outside

Exterior and interior white

All Hörmann entrance doors in standard Traffic white, RAL 9016, are matt powder-coated on the inside and outside.

Exterior coloured, interior white

The Hörmann entrance doors in 18 preferred colours (see left) are powder-coated in the preferred colour on the exterior and in matt Traffic white RAL 9016 on the interior as standard.

Exterior and interior in a colour of your choice

On request you can have your new entrance door colour-coated on both sides; different combinations are also possible, e.g. Ruby red on the exterior and Slate grey on the interior.

Premium down to the last detail

1 Concealed hinges

The hinges of the ThermoCarbon entrance door are concealed between the door frame and leaf, i.e. they are not visible either from inside or outside: a visually elegant solution for your home. The door leaves can be simply and easily adjusted. This way, you can close your entrance door comfortably and securely at all times.

2 Tamper-proof profile cylinder

The tamper-proof profile cylinder, certified in accordance with DIN 18252 / DIN EN 1303, features premium fittings: an anti-picking system, drill protection and an emergency and hazard function. This means that the door lock can still be operated when a key is inserted on the inside. 5 reversible keys are delivered with the door.

Flush-mounted security rose escutcheon on exterior

The stainless steel security rose escutcheon fits into the door leaf particularly elegantly, and also protects the profile cylinder against being drilled open.

3 Stainless steel interior lever

The elegant Caro stainless steel interior lever is standard for ThermoCarbon entrance doors.

4 Continuous stainless steel closing strip

The high-quality stainless steel closing strip is elegantly integrated into the door frame. This enables optimum adjustment of the door and allows for secure locking at all times.

5 9-point security lock H9 and concealed hinges that cannot be forced open

The ThermoCarbon comes with 9-point security. When locking, 5 steel swing bolts and 4 bolt locks pivot into the stainless steel lock plates. This top security protects your door with just one turn of a key.

Optional: break-in resistant RC security features

This increased security is available for entrance doors and side elements with RC 2, RC 3 and RC 4 features. For further information, please see page 80.

Flush-fitting exterior handles for exclusive door designs

6 Stainless steel handle with recessed grip

Doors with a stainless steel handle come as standard with a recessed grip in the colour of the door.

7 Continuous aluminium handle bar

As standard, the complete handle bar is supplied in White aluminium, RAL 9006, silk-gloss, with a recessed grip in the colour of the door.

8 Aluminium handle bar with recessed grip

As standard, this handle bar comes in White aluminium, RAL 9006, silk-gloss, with a recessed grip in the colour of the door.

Custom handle colours

All flush-fitting exterior handles (except for stainless steel handles) are also available in several colour variants. For further information, please see page 78.

The perfect balance between comfort and security

Our ThermoSafe entrance door will convince you with its security and thermal insulation. Thanks to the solid 73-mm-thick aluminium door leaf with PU rigid foam infill and an aluminium leaf profile with thermal break on the inside, ThermoSafe entrance doors feature a U_D -value up to $0.8 \text{ W}/(\text{m}^2 \cdot \text{K})$. The 5-point security lock as standard and the optional RC 2 or RC 3 security equipment give you a comforting feeling of safety when you go to bed at night.

The appearance of the ThermoSafe also leaves nothing to be desired. With over 70 door designs, from classic to modern, in 18 preferred colours, you are sure to find the door of your dreams. With optional equipment such as handles, glazings or innovative door operators, you can customise your door even further.

Design

- 1** Solid 73 mm aluminium door leaf with PU rigid foam infill and internal leaf profile
- 2** Aluminium leaf profile with thermal break
- 3** 80 mm aluminium door frame with thermal break
- 4** Triple sealing with an all-round seal

Complies with EnEV 2014

Suitable for fitting without thermal bridges

U_D -value up to $0.8 \text{ W/(m}^2\cdot\text{K)}$

Equipment

- 5** Solid door view from the inside, same as room doors
- 6** 3-way adjustable hinges
- 7** Aluminium interior lever
- 8** Tamper-proof profile cylinder
- 9** 5-point security lock

Optional RC 2 / RC 3 safety equipment

- 10** Security bolts

Interior view

Style 40

Stainless steel handle HOE 550, exterior design glass, laminated safety glass partially matt in the top section with stripes, centre clear float with partially matt stripes offset from the exterior pane, triple thermal insulation glass, U_D -value up to $1.1 \text{ W/(m}^2\cdot\text{K)}^*$

Entrance door and garage door perfectly match each other

The large matching Hörmann programme provides you with aligned entrance door and garage door ribbing options for a matching appearance. The result: No optical offset from the base line. You will see: the beauty of your home is reflected in these small but crucial details.

Perfectly matched:
entrance door styles and sectional garage doors, M or L-ribbed

ThermoSafe entrance doors:

Style 825
Style 845
Style 855

Sectional garage doors, M-ribbed:

with a door height of 2000 mm
with a door height of 2125 mm
with a door height of 2250 mm

ThermoSafe entrance doors:

Style 875
Style 895
Style 898

Sectional garage doors, L-ribbed:

with a door height of 2000 mm
with a door height of 2125 mm
with a door height of 2250 mm

▲ **ThermoSafe style 895** in the preferred colour Anthracite RAL 7016, matt, L-ribbed sectional garage door in Silkgrain, Anthracite RAL 7016

Matched entrance and garage doors

The cross-section of the entrance and garage door clearly shows the ribbed look of the entrance door is a result of the grooves in the infill. In the garage door, it comes from the ribbing of the individual sections and the section transitions.

ThermoSafe entrance door cross-section

Sectional garage door cross-section

After exact on-site measurement, your Hörmann specialist dealer will offer expert advice in choosing the perfect overall look from these entrance door styles.

Find your favourite colour

At Hörmann, we value individuality and variety. That's why we offer entrance doors in the colour of your choice as a matter of course. For example, you can select your favourite colour from the inexpensive matt Traffic white RAL 9016 and 18 additional preferred colours. Of course, you can also select from over 200 further RAL colours and many neon and pearl-effect colours on request. Your Hörmann dealer is happy to assist you.

Please note:

All colours based on RAL.

The colours and surfaces shown are subject to the limitations of the printing process and cannot be regarded as binding. Please seek the expert advice of your Hörmann specialist dealer.

Matt, silk-gloss and high-gloss surfaces

| 8 | | Hörmann colour CH 607, Chestnut, textured |

Design your door colour exactly as you wish, inside and outside

Exterior and interior white

All Hörmann entrance doors in standard Traffic white, RAL 9016, are matt powder-coated on the inside and outside.

Exterior coloured, interior white

The Hörmann entrance doors in 18 preferred colours (see left) are powder-coated in the preferred colour on the exterior and in matt Traffic white RAL 9016 on the interior as standard.

Exterior and interior in a colour of your choice

On request you can have your new entrance door colour-coated on both sides; different combinations are also possible, e.g. Ruby red on the exterior and Slate grey on the interior.

High quality all-round

1 3-way adjustable hinges

The beautifully designed three-way hinges allow the ThermoSafe entrance door to be variably adjusted. This way, your entrance door is optimally sealed and falls smoothly and securely into its lock.

Optional concealed hinges (not shown)

Concealed hinges make for an elegant door appearance on the interior. The hinges are leverage-proof so that the security bolts on the hinge side can be omitted.

2 Tamper-proof profile cylinder

The profile cylinder is equipped with an anti-picking system and drill protection. In addition, it offers an emergency and hazard function, i.e. the door lock can still be operated when a key is inserted on the inside. The tamper-proof locking cylinder is certified according to DIN 18252 / DIN EN 1303 and is delivered with 5 reversible keys.

Exterior surface-mounted security rose escutcheon

The patented exterior rose escutcheon also protects the profile cylinder against being drilled open and twisted off. Delivered as standard in Traffic white RAL 9016, or in stainless steel for coloured doors.

3 Aluminium interior lever

ThermoSafe entrance doors are equipped as standard with the attractive Rondo interior lever, stove-enamelled in white. Optionally, it is also available in stainless steel or your choice of RAL as well as the versions Caro or Okto, also in stainless steel.

4 Stainless steel lock plates

The lock plates ensure a convenient adjustment of the door, so that your door falls shut optimally and can be closed securely.

5 5-point security lock H5 and security bolts on the hinge side

When locking, 3 steel swing bolts with 2 additional bolt locks pivot into the stainless steel lock plates. The swing bolts make it more difficult for the door to be pulled apart or forced open (S5 Automatic for oversizes).

Optional: break-in resistant RC security features

This increased security is available for entrance doors, side elements and transom lights with RC 2 and RC 3 features. For further information, please see page 80.

Optional frame variants for an individual look

6 Broader door frames

On request, door frames are also available in a width of 110 mm, for a more convenient and attractive connection to full thermal insulation, for example.

7 Fascia frame Rondo 70

The rounded frame profile adds a stylish touch to your entrance door, providing it with a particularly harmonious look with its rounded edges.

8 Fascia frame Caro 70

This version has an attractive and distinguished look that upgrades the appearance of your door through the frame's depth effect.

The entrance door that makes you feel welcome

The ThermoPlus entrance door offers you everything that makes for an excellent entrance door. The solid 65-mm-thick steel door leaf with PU rigid foam infill and the leaf profile on the inside made of composite material as well as the aluminium frame with thermal break keep the cold out. With a U_D -value of up to $0.87 \text{ W/(m}^2\cdot\text{K)}$, ThermoPlus doors feature good thermal insulation. As standard, the doors are equipped with a 5-point security lock, allowing you to feel safe and secure in your home. All ThermoPlus styles are optionally available with RC 2 safety equipment to make you feel even more secure in your own four walls.

Choose your favourite of 8 attractive styles and customise it with one of our 15 preferred colours and 5 Decograin decors.

Design

- 1** Solid, 65-mm-thick steel door leaf with leaf profile on the inside and thick rebate
- 2** Thermal break and higher stability through the leaf profile made of composite material
- 3** 80 mm aluminium frame with thermal break
- 4** Triple sealing

Complies with EnEV 2014

Suitable for fitting without thermal bridges

U_D -value up to $0.87 \text{ W}/(\text{m}^2\cdot\text{K})$

Equipment

- 5** Solid door view from the inside, same as room doors
- 6** 3-way adjustable guide rollers
- 7** Stainless steel interior lever
- 8** Profile cylinder with emergency and hazard function
- 9** 5-point security lock

Optional RC 2 safety equipment

Interior view

Style 010

Stainless steel handle HB 14-2 on steel infill, U_D -value up to $0.87 \text{ W/(m}^2\text{K)}^*$

Elegance and detailed accuracy

Decograin is available in four natural-looking timber designs and with an anthracite metallic effect. An embossed wood grain gives it an authentic timber character.

5 Decograin decors

- 1 Decograin Golden Oak: medium brown, golden yellow oak design
- 2 Decograin Dark Oak: walnut-coloured oak decor
- 3 Decograin Night Oak: dark, intense oak design
- 4 Decograin Winchester Oak: natural-coloured knotty oak design
- 5 Titan Metallic CH 703: Anthracite with a metallic effect

Please note

The colours and surface finishes shown are subject to the limitations of the printing process and cannot be regarded as binding. Dark colours should not be used for doors that are exposed to the sun, as an increased material expansion may impair the door's function.

Harmony in every detail

1 Perfectly hung with 3-way adjustable guide rollers

Sturdy, two-part 3-way adjustable hinges with safety pins and stainless steel decorative covers guarantee smooth door function.

2 Securing the hinge side

Being able to rest easy in your own home is important. On the ThermoPlus door, a continuous aluminium security strip additionally secures the hinge side, making forced opening of the door practically impossible.

3 Interior lever

Each door comes with a beautifully shaped stainless steel interior lever and rose escutcheon on the exterior as standard.

4 Profile cylinder

Delivered with 5 keys as standard. With emergency and hazard function, i.e. the door lock can still be operated when the key is inserted on the inside.

5 5-point security lock

You will feel safe at home: 2 conical swing bolts engage with 2 additional security bolts and 1 lock bolt in the frame's lock plates and pull the door tightly shut. The lock plate on ThermoPlus doors is adjustable for an optimal door setting. With a soft-lock latch to quietly close the door.

Optional: break-in-resistant security equipment

Depending on your requirements, you can select this increased security for entrance doors, side elements and transom lights with RC 2 features. For further information, please see page 80.

6 Frame

The 80 mm aluminium frame with thermal break and PU infill is available in a round or rectangular profile.

Automatic locks

Open your entrance door easily and conveniently via multiple-point locking using a hand transmitter, radio finger-scan or transponder. There's no longer any danger of forgetting your keys.

7 Opening via a transponder ■ NEW

For opening with a transponder, the entrance door is equipped with an electromechanical profile cylinder. Hold the transponder in front of the cylinder to unlock and open your door using the knob.

8 Opening via a hand transmitter ■ NEW

9 Opening via a radio finger-scan ■ NEW

When operating the entrance door via a hand transmitter or radio finger-scan, it automatically unlocks via an electric motor. You can then push the door open.

Electric strike (not shown)

With the electric strike catch, you can conveniently open your door via a switch inside the house. Alternatively, e.g. during the day, you can also toggle the locking lever so that the entrance door can be opened by a slight push from the outside.

Door drip (not shown)

Attractive protection: The door drip in Traffic white RAL 9016 diverts driving rain and is easy to retrofit.

Glass entrance doors for well-lit entrance areas

Our TopComfort glass entrance doors create a bright and cheerful entrance area with solid equipment. The doors are characterised by a 80-mm-thick aluminium door profile and 80 mm aluminium door frame with thermal break and feature good thermal insulation with a U_D -value up to $1.3 \text{ W}/(\text{m}^2 \cdot \text{K})$ auf. The standard 5-point security lock provides the security you expect of an entrance door. This way, you can design an entrance area that is not only tasteful, but also secure.

You can choose between 9 exclusive glass door styles that let in a maximum of natural light. We can supply the frame in one of 18 preferred colours according to your taste. You can personalise the door of your choice with stylish exterior and interior handles and glazings.

Design

- 1** Aluminium leaf profile with thermal break

Doors that make your wishes for well-being at home come true

Our optional extras offer you a variety of possibilities to design the door of your dreams according to your individual preferences.

For example, you can combine colours, handles and glazings according to your taste. We also offer you a choice with regard to security:

You can choose between various automatic lock variants and convenient operating options that fulfil your needs. Whatever you decide on – at Hörmann, you will find an entrance door to suit both your taste and your home.

Designing entrances with side elements and transom lights

To create an impressive entrance to your home, you can individually combine each of the illustrated ThermoSafe, ThermoPlus and TopComfort entrance doors with side elements and transom lights, or combine each ThermoCarbon entrance door with side elements. An elegant and attractive overall look will please you for a long time to come.

Our designer handles

A continuous design handle not only rounds off the exclusive appearance of your entrance door, it is also extremely comfortable to operate. As a result, small children can also open the door using this handle. DesignPlus handles offer you elegant embellishments to create a customised door. This lets you adjust both the handle and handle embellishment to match the colour of the door and the rest of your home.

Persuasive elegance in 3 colours and in RAL to choose: the design handle G 750 for ThermoSafe

Handle in Traffic white, RAL 9016, matt

Elegant interior levers

To create a harmonious indoor appearance, you can select from various interior levers for your new entrance door. **ThermoSafe and TopComfort doors** are equipped with the aluminium interior lever Rondo as standard. This lever is also available in stainless steel or a RAL colour of your choice to match the stainless steel interior levers on your internal doors. In addition, the stylish lever handles Caro and Okto are available as stainless steel variants.

ThermoCarbon doors are equipped with the stainless steel Caro lever handle as standard.

ThermoPlus entrance doors are available with a stainless steel lever handle as standard.

Aluminium lever handle Rondo in matt Traffic white, RAL 9016, for ThermoSafe and TopComfort

Stainless steel lever handle Caro for ThermoSafe and ThermoCarbon

Stainless steel lever handle Okto for ThermoSafe

Stainless steel lever handle for ThermoPlus

Perfectly protected with standard and optional extras

You can rely on the high quality of Hörmann entrance doors when it comes to security. All doors have multiple-point locking as standard and can also have optional features added. The ThermoSafe and ThermoCarbon entrance doors, side elements and transom lights* are available on request with especially break-in-resistant RC features.

Optionally available for all ThermoCarbon, ThermoSafe, ThermoPlus and TopComfort entrance doors, side elements and transom lights*

Optionally available for all ThermoSafe and ThermoCarbon entrance doors, side elements and transom lights*

Optionally available for all ThermoCarbon entrance doors (up to a door height of 2350 mm)

Certified security means you can feel at ease

It is good to know that the proven security of Hörmann entrance doors remains, even though the designation is new: instead of "WK" for "Widerstandsklasse" (German for resistance class), the designation is now RC for "resistance class". The testing requirements have also become stricter, now checking to see how much time a potential burglar needs to break in and which tools are used. The carefully tested break-in protection is also recommended by police information centres. Further information can be found at: www.k-einbruch.de

Invisible security

Increased security doesn't mean that the door can't look good. The optional RC versions include a break-in resistant door version with special security glazings, among other things. The additional security features are not visible in the door. That's brand quality from Hörmann!

Securing excellent properties

Fingerprint, code or radio – Hörmann offers automatic lock variants for more security and convenient operation.

ThermoSafe entrance doors are optionally available at no surcharge with the automatic lock S5 that automatically and securely locks your entrance door at five different points as soon as the door falls shut. You can also equip your ThermoCarbon entrance door with the 7-point automatic lock S7 at no surcharge. You may, of course, also continue to use a key to lock and unlock your door.

Tip:

The S5 / S7 automatic locks have been tested and certified by the VDS (German Property Insurance Association). This means that the self-locking doors are considered locked / bolted in case of a break-in, maintaining your claims towards your property insurance.

ThermoSafe

Automatic lock S5 Automatic with 5-point locking

The latch catch lock with mechanical self-locking is **optionally available at no surcharge** for your ThermoSafe entrance door: if the door falls shut, the 4 bolts automatically extend and reliably lock the entrance door. In addition, the door can also be secured via the lock with another bolt.

Automatic lock S5 Comfort

In the same way as the S5 Automatic, the automatic lock S5 Comfort locks your entrance door automatically with latch catches. An additional electric motor enables unlocking of the door via external control elements, such as a finger-scan, code switch or hand transmitter (see following pages). In this process, the power and data signals are transmitted from door frame to door leaf via a cable in the door rebate. S5 Comfort is prepared for connection to a button or an existing house intercom and is ideally suited for blocks of flats. This way, you can conveniently open your entrance door at the press of a button, for example from an upper storey.

S5/S7 Comfort – open the door at the push of a button

ThermoCarbon

Automatic lock S7 Automatic with 7-point locking

All ThermoCarbon entrance doors can be **optionally** equipped with a latch catch lock with 6 bolts, which automatically extend when the door is closed (**free-of-charge**). In addition, the door can also be secured via the lock with another bolt.

Automatic lock S7 Comfort Connect

The automatic lock S7 Comfort Connect also automatically closes your door via a latch catch lock. Thanks to an integrated electric motor, you can also operate your ThermoCarbon entrance door conveniently via finger-scan, code switch or radio. You can see the various options on the following pages. Data transmission is wireless thanks to the innovative **HOE Connect** contact strip. If your building has a house intercom, you can connect the S7 Comfort Connect to it and equip the lock with a button.

Extremely practical: wireless data transfer with HOE Connect

Convenient operation for young and old alike

S5 / S7 Scan automatic lock

Open your entrance door with your fingerprint.
The finger scanner recognises up to 100
fingerprints and can be taught in without
a computer.

S5 / S7 Scan – door is opened by fingerprint –
fitted in the door leaf

S5 / S7 Code automatic lock

Simply entering your personal security code
opens your entrance door from outside.

S5 / S7 Code – door is opened by entering a code –
fitted in the door leaf

Finger-scan in the door handle

Code switch – fitted in the door handle

Automatic lock S5 / S7 Smart

You can conveniently open your entrance door with an optional hand transmitter or a radio switch. The extremely safe radio system ensures that no unauthorised person can copy your radio signal. Another advantage is that you can use the same hand transmitter to operate your Hörmann garage door or entrance gate. The S5 / S7 Smart remote control can also be installed in the S5 / S7 Scan and S5 Code convenience packages. Starting now, you can also operate and control ThermoSafe and ThermoCarbon entrance doors with the practical BiSecur app. This allows you to query the status of your door at any time and any place.

S5 / S7 Radio – open the door using BiSecur radio

Door operator ECTurn ■ NEW for barrier-free entrances

As of now, ThermoSafe and ThermoCarbon entrance doors can optionally be equipped with the new door operator ECTurn. For ThermoSafe doors, the operator is fitted on the door leaf and frame. For ThermoCarbon entrance doors, the operator is elegantly integrated into the door leaf and frame. With the automatic lock and ECTurn, you can automatically open and close your door. You can control the operator easily via radio or the BiSecur app, which also allows you to query whether your door is open or closed from anywhere in the world.

Convenient opening with the entrance door operator ECTurn. For ThermoCarbon entrance doors, the operator is elegantly integrated into the door leaf and frame.

Select your hand transmitter or radio switch from our broad accessories programme. More information can be found in the Garage Door and Entrance Gate Operators brochure.

With the BiSecur app, you can check whether your entrance door is open or closed.

Well thought-out:
superior design and protection
in any kind of weather
