HF 310 timber/aluminium window

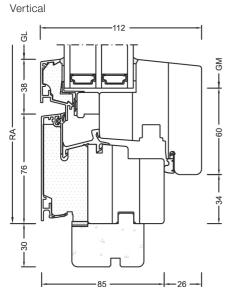

HF 310

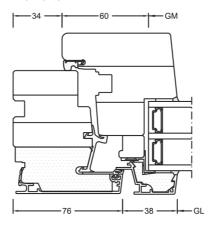

A great combination of timber, aluminium and highly insulating thermal foam in between. Excellent thermal insulation values, natural timber refined with subtle paints and weather-resistant aluminium on the outside make the HF 310 the absolute classic among the timber/aluminium windows. Due to the same, flush design of the aluminium clad, HF 310 can be combined with UPVC window KF 410. All round bonding of the glass pane (I-tec Glazing) ensures excellent stability and security protection. Triple continuous gaskets protect the interior area from exposure to rain.

ECLAZ[®]

Daylight is crucial for our human organism, our wellbeing and our health. Therefore, Internorm windows are equipped with premium glass coating ECLAZ[®] as standard. The blue components of the light spectrum are transported through the glass more and ensure up to 10 % more daylight. Compared to conventional market glazing, ECLAZ[®] is offering:

More aesthetics –	colour-neutral outside view, a combination of function and aesthetics
More light –	up to 10% more daylight – better for health and wellbeing – a significant advantage especially in the dark winter months*
Visual comfort -	for a brilliant view to the outside

Room comfort – makes living areas even lighter and friendlier

Energy efficiency – excellent insulation of interior thus reducing heating costs - increased energy efficiency in building - up to 11 % less CO₂ emissions

* In direct comparison to same glass buildups.
